

## **Xpress Natural Gas (XNG) Provides Cleaner Alternative Fuel to Paper Mill and Significant Savings**

**XNG is a “virtual pipeline” company that provides trucked natural gas solutions to locations where the pipeline infrastructure does not provide gas service. XNG helps customers thrive by enabling them to realize the benefits of natural gas as a less expensive, cleaner, and lower maintenance fuel alternative to conventional fuel oil and propane.**

**When a paper mill in the NW was faced with new environmental regulations, they had to evaluate other fuel and power options. Natural gas looked like the most attractive alternative, but pipeline infrastructure was not available. Discussions with local utility companies associated to providing the necessary infrastructure were not fruitful. The timing and costs made natural gas appear to be a long shot.**

**XNG provided unparalleled service and technical expertise to help the paper mill transition smoothly to compressed natural gas (CNG) using Mobile Pipeline® units from Hexagon.**

**The successful project resulted in annual savings of \$1.2MM and a reduction of 17,000 tons of CO<sub>2</sub> per year. XNG delivered strong economic and environmental benefits with their “virtual pipeline” solution that provided the paper mill with compressed natural gas through a network of pipeline terminals, trucks, and on-site decompression stations.**

## **About Hexagon Mobile Pipeline**

**Hexagon delivers safe and innovative solutions for a cleaner energy future. Our solutions enable storage, transportation and conversion to clean energy in a wide range of mobility, industrial and consumer applications. Hexagon Mobile Pipeline® developed the first virtual pipelines in the world and is the market leader with more than 1,600 units deployed around the globe.**

## **About XNG**

**Xpress Natural Gas (XNG) provides rapid and reliable delivery of liquid natural gas (LNG) and compressed natural gas (CNG) to customers throughout the United States and the Canadian Maritimes through their network of virtual pipelines. With more than 70 million gasoline gallon equivalent (GGE) under contract for 2017, XNG is the largest private distributor of CNG in the United States, helping business, institutions, and utilities to lower energy costs and reduce their environmental impact.**
